SPINNAKER

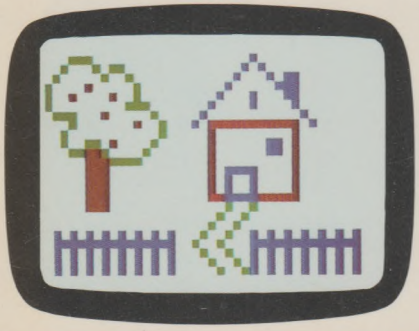
KINDER COMP™

KinderComp is a great way to introduce young users to computer learning. KinderComp lets children learn about the computer while they're having fun.

And it's six games in one.

The first game, DRAW, lets your child easily create colorful pictures on the screen using either a joystick or the keyboard.

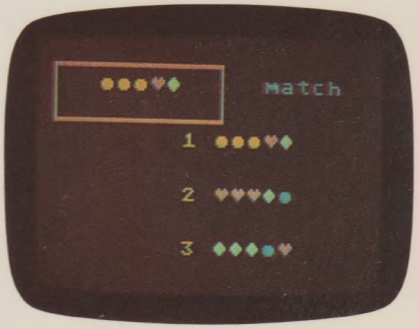
SCRIBBLE lets your child select any keyboard key and then see it displayed on the screen with bright colors and lively sounds.



NAMES lets children see their names like they've never seen them before. Just type the name in and the computer shows the child's name in a variety of colorful ways.

SEQUENCE presents the child with four sequential numbers and asks the child to fill in the fifth. Correct answers bring colorful rewards.

LETTERS displays a lower case letter on the screen. Your child simply presses the upper case letter on the keyboard that matches the letter on the screen. When your child matches five letters correctly a reward of color and sound will be provided.



MATCH presents your child with one pattern inside a box and three patterns with corresponding numbers outside the box. Your child then simply matches the pattern inside the box with pattern one, two or three. Five correct matches will reward your child with colorful animation and sound.

Dr. Doug Davis, author of KinderComp, is an educator and innovator in screen graphics and play formatting. He wrote KinderComp for his own 5 year old daughter.

Educational Value: KinderComp helps children develop their creativity and helps improve counting skills and reading readiness.

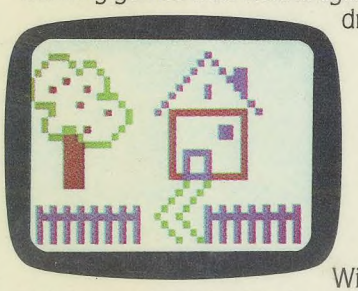
JOYSTICK

KINDERCOMP™

KINDERCOMP is a collection of six fun learning games that encourages young children to start learning on the computer.

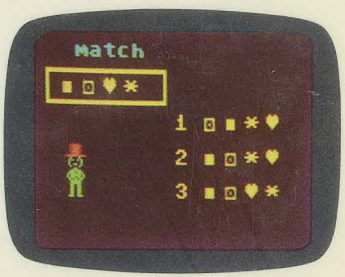


And each exercise lets your child have a terrific time in a different way. With KINDERCOMP, kids can create colorful pictures, or enjoy bright colors and neat sounds as they press different keys to scribble on the screen. They can also make their names come to life with colorful animation.

In addition, KINDERCOMP challenges children to find the letters or numbers on the keyboard that match the ones on the screen. And they can enjoy the spectacular pictures and sounds that reward them when they successfully match shapes or complete number sequences.

It's fun and exciting. And that's why kids love KINDERCOMP.

Dr. Doug Davis, author of KINDERCOMP, is an educator and innovator in screen graphics and play formatting. He wrote KINDERCOMP for his daughter Amy.



Educational Value: KINDERCOMP helps children improve their reading readiness and counting skills. It also familiarizes young children with the keyboard. Ages 3-8.
